How Many Feet?

I can find lengths of objects using **nonstandard** units of measure.

Directions: <u>Nonstandard unit of measure—Student's hands</u>.
Choose 5 different objects. Estimate the length of each object. Measure each object and then order the lengths from least to greatest.

Name of Object	Estimate	Measurement
1.		
2.		
3.		
4.		
5.		

Ordering Objects from LEAST to GREATEST:

1._____

2._____

3._____

4._____

5._____
