

Science - Week 5
Classification and habitats
Online Investigation and activities

Activity 1 – Pre Learning Activity to
research and classify invertebrates

Activity 1 - You will be using information sources to find facts about different invertebrates.

Websites for research:

<https://www.dkfindout.com/uk/animals-and-nature/invertebrates>

<https://www.nationalgeographic.com/animals/invertebrates>

After that, use the boxes on the pre-learning sheet to create fact files of common garden invertebrates.

Some have been created as an example to help you, while others have spaces on that can be completed with your own research.

If you cannot print off the resource, you can always create a fact file on plain paper and draw boxes using similar layout.

Finally, once you have created your fact file cards, you can play the game of 'Top Trumps' with a family member using your different fact files
