# What is a plant?

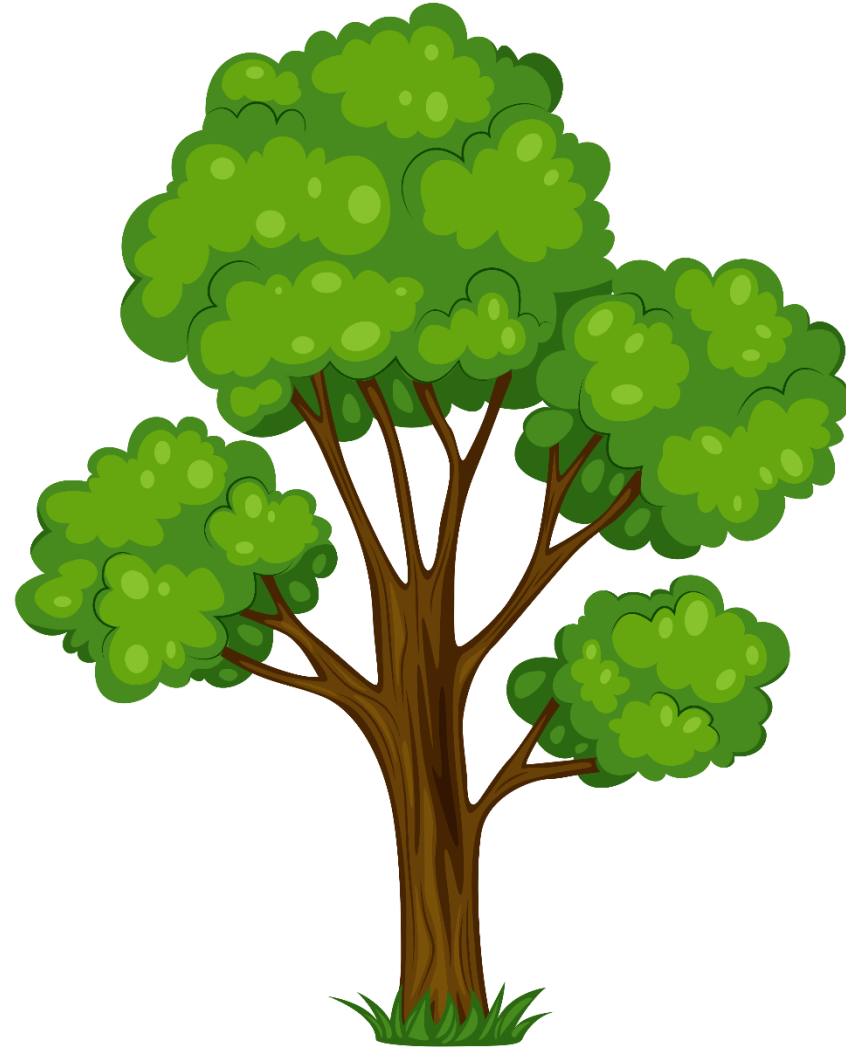

Tell your partner

TREES

Today we are learning about the parts of a tree

Do you know  
any parts of a  
tree already?

## Crown

The crown is made up of the leaves and branches at the top of a tree

## Twig

this is where the buds, fruits and flowers of the tree are

## Branch

provides the support to distribute the leaves efficiently

## Leaves

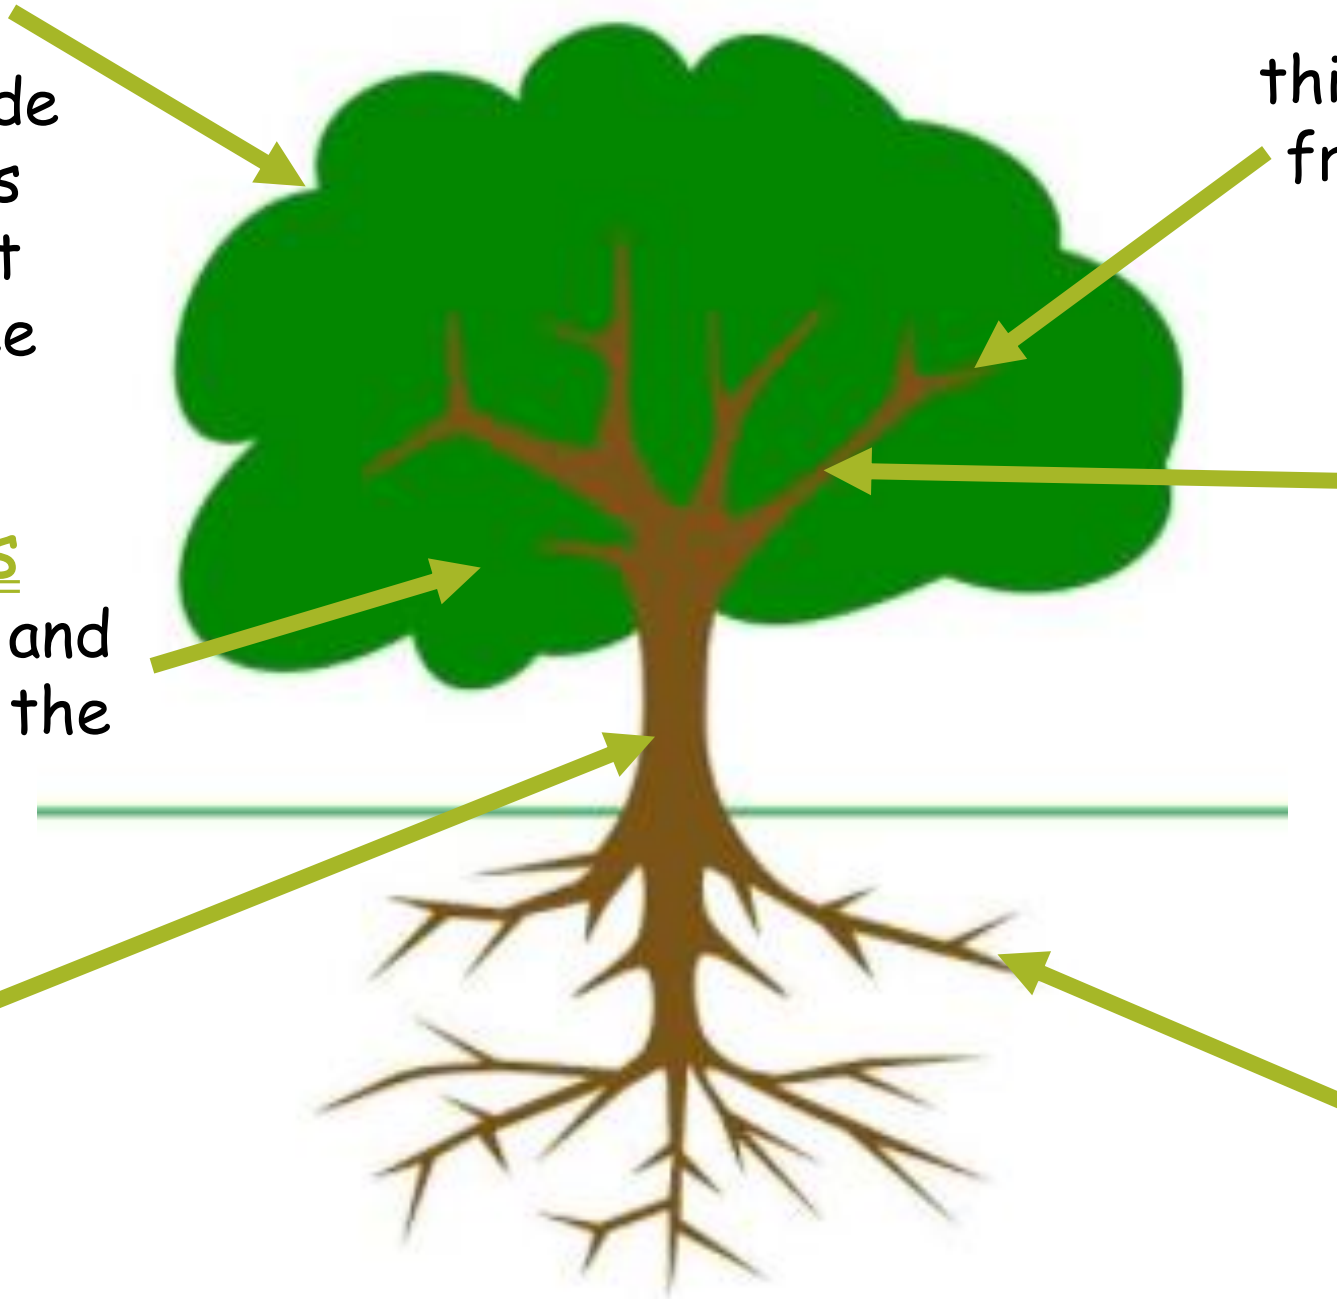

gather water and nutrients for the tree

## Trunk

supports the leaves and the branches of the tree

## Roots

They gather water and nutrients to help the tree grow

# Buds, fruit and flowers

A bud is an undeveloped shoot from which leaves or flower parts grow.

The fruits of the tree is the part which you can eat, such as an apple.

Flowers attract insects to help pollination.

Now can  
you sing  
about it?
