

E-Safety

If someone is harassing or threatening you unfriend them, block them and report them to the site or game administrator.

On some websites, they let you have spaces in your passwords. If you want you can make your password a sentence but don't always keep the same password on all accounts you use on the internet.

When on an online website turn your account to private to not let any stranger get their hands on any of your private information.

STAY SAFE!

Grooming

Don't trust strangers online, you never know what age they are or who they are.

What is it?

Grooming is when someone tries to gain your trust and then befriends you by making you do inappropriate stuff.

Report

If someone is ever trying to make you do something wrong and you want to talk about it; call CEOP
